MICHELIN X SNOPLUS

Safety first for cranes on snow and mud

| SIZES | TREAD DEPTH | |
|---------------------|-------------|-----------------------|
| | mm | 32 nd inch |
| 385/95 R 24 TT 170E | 24 | 30.2 |
| 385/95 R 25 TL 170E | 25 | 31.5 |

➤ SAFETY

- The tread pattern comprises many independent blocks separated by 3 circumferential grooves. All blocks have multiple sipes and the combination of the two is the basis for optimal handling in winter, very good steering precision and high levels of adhesion.
- Re-designed sidewalls with a protective band on the shoulder/sidewall interface provide excellent protection against accidental damage.

➤ TRACTION

- Tread blocks with multiple sipes and offset shoulder blocks ensure excellent traction in mud and on snow and ice.
- The tread pattern, open at the shoulders, is the foundation for the excellent self cleaning in snow or mud.

REPAIRABLE TYRE

BENEFITS OF THE MICHELIN® RADIAL TECHNIQUE

- longer tyre life
- better traction on all types of surface
- lower fuel consumption
- improved comfort
- increased resistance to punctures / flats
- increased heat resistance
