## THE MICHELIN XZH TIRE

## THE ROBUST TIRE FOR YOUR DUMPED TRUCK FOR OFF-ROAD USE

### WITH THE MICHELIN XZH TIRE, YOU GET:

- Excellent resistance to damage (tire crown and sidewalls).
- Excellent traction whatever the rolling conditions.
- High load capacity.
- Extended service life.

### EXCELLENT COST PER HOUR:

- Advanced solution for use in off-road tough conditions.
- A good replacement for “worksite approach” road tires for 100% off-road usage, considerably reducing operating costs.

### ALL THE ADVANTAGES OF A MICHELIN RADIAL EARTHMOVER TIRE:

An ultra-resistant radial tire with an extensive service life, specifically for 8x4 and 10x4 trucks for tough applications, solely for off-road use.

- The MICHELIN XZH tire

Size	tread depth		PR
	mm	32-inch	
12.00 R 24 XZH E3*** TT	30	37,8	24

### WITH THE MICHELIN XZH TIRE, YOU GET:

- Excellent performance in a wide variety of off-road uses, such as quarries, construction, infrastructure and mining operations thanks to greater ground clearance.
- Noteworthy performance thanks to a tread offering high resistance to cuts and abrasion and a significant tread depth.
- A reduction of down time due to impact and cuts thanks to a robust, reinforced casing composed of steel plies.
